Product Spotlight

Ultra Natural Half-Well Tips are a quick & simple way to extend your nails! They are fun to use with any color of Versatility gel!

NAIL PREP

1 Gently push back the cuticle & scrape away any loosened cuticle on the nail plate.

2 Use a 180-grit file to shape the free edge of all nails.

VERSATILITY GEL – TIP & OVERLAY

3 Gently remove the shine of the nail using a 180-grit nail file or buffer.

4 Remove dust with a nylon brush.

5 Use a lint free cloth or pad saturated with the ASP 2-in-1 Dehydrator & Cleansing Wipe to thoroughly cleanse the nails of any dust or debris.

LET'S DO OUR TIP OVERLAY USING VERSATILITY GEL!

1 Size the form for each nail from sidewall to sidewall.

PRO TIP

It's better for the tip to be slightly bigger than the nail than too small.

2 Use the ASP Instant Nail Glue from your tip box and apply a small bead in the well of the tip.

3 Place the top of the well at the free edge & gently push down towards the cuticle. Once the tip is in place hold for several seconds.

4 Trim the tips to desired length & shape.

5 Shape the nail to desired length & shape using a 180-grit file.

VERSATILITY GEL – TIP & OVERLAY

- 6** File the surface of the nail tip with a 180-grit file & blend the line of demarcation of the tip flush to the natural nail.

PRO TIP

Keep the file flat or parallel to the nail tip to avoid damage to the natural nail.

- 7** Remove dust & debris using a soft brush.

- 8** Apply Acidless Primer to the natural nail.

- 9** Squeeze a large bead of Versatility Gel Sure Thing onto a pusher or birchwood manicure stick.

- 10** Gently roll the bead onto the arch of the nail.

PRO TIP

As you apply Versatility Gel ensure you keep your brush moist with ASP 2-in-1 solution so the product does not stick to your brush and has a smooth application. As you work your way down the nail, hold the brush parallel to the nail and stretch the gel to the very edge of the nail tip.

- 11** Saturate your Gel Brush in ASP 2-in-1 Solution. Use your gel brush to push & pat gel into place from the cuticle to the free edge, pressing more around the cuticle and perimeter to create a seal around the edges and leaving the product thicker toward the center.

VERSATILITY GEL – TIP & OVERLAY

12 Cure for 60 seconds in the LUMINA Rechargeable Lamp.

13 File the perimeter of the nail with a 180-grit file and gently smooth the surface if needed.

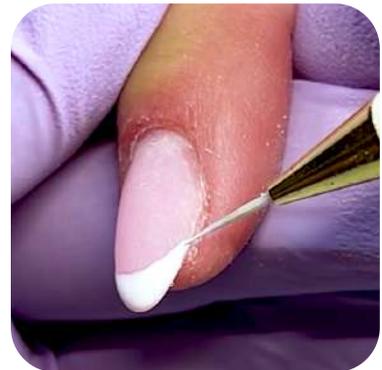

14 Use your Four-Sided Soft White Polar Block to smooth the surface.

15 Remove dust & debris using a soft brush.

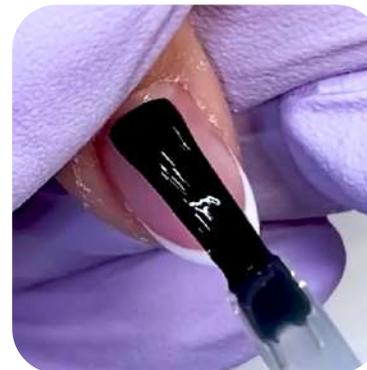

16 Use White Hot Gel Polish to create a French tip.

17 Use a liner brush to define the smile line.

18 Remove excess product from the skin with a gel brush dipped in acetone. Cure for 60 seconds when complete. Repeat the step.

19 Apply No Wipe Top Coat & cap the free edge. Cure for 60 seconds when complete.

20 Apply ASP milk and honey dry oil to cuticle and massage into surrounding skin.
