LED/UV Versatility GEL IN A TUBE

MAINTENANCE - FILL

Learn how to do a Maintenance-Fill using ASP Versatility Gel!

 **WATCH VIDEO**
STEP BY STEP TUTORIAL

PRODUCTS YOU WILL NEED

Zebra 180-grit Nail File, Four-Sided Soft White Polar Block, Acidless Primer, **Versatility Gel Fuzzy Slippers**, 2-in-1 Dehydrator & Cleansing Wipe, Glass Dappen Dish, Flat Gel Brush, LUMINA Rechargeable Lamp, Ultra Birchwood Manicure Sticks, No Wipe Top Coat, Roll-On Milk & Honey Cuticle Oil.

Product Spotlight

Maintenance and Fill have never been easier or more beautiful than with Versatility Gel!

LET'S BEGIN OUR MAINTENANCE FILL!

1 Use a 180-grit file to take down the bulk of the existing product.

2 Use a buffing block to even out the product surface. Be sure the area around the cuticles is free of any lifting product.

VERSATILITY GEL – MAINTENANCE FILL

3 Use 2-in-1 Dehydrator & Cleansing Wipe to clean the natural nail & then apply any ASP Primer.

4 Saturate your Gel Brush in ASP 2-in-1 Solution and use your gel brush to push & pat gel into place from the cuticle to the free edge, pressing more around the cuticle and perimeter to create a seal around the edges and leaving the product thicker toward the center.

PRO TIP

Use a lint-free wipe saturated in 2-in-1 Solution to clean excess gel from your brush.

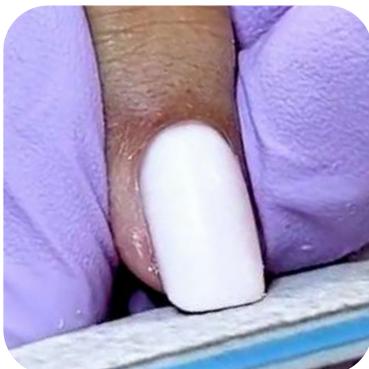

5 Cure for 60 seconds in the LUMINA Rechargeable Lamp.

6 Excess product can be easily removed by pulling it to the edge of the nail & scraping or brushing it down.

7 Cure for 60 seconds in the LUMINA Rechargeable Lamp.

9 Shape the free-edge of the nail with a 180-grit file.

10 File the perimeter of the nail with 180-grit file.

11 Remove dust & debris.

VERSATILITY GEL – MAINTENANCE FILL

12 Smooth the surface of the nail if needed. Remove dust.

13 Apply No Wipe Top Coat & ensure to cap the free edge.

14 Cure for 60 seconds when complete.

15 Finish the look with Roll-On Milk & Honey Cuticle Oil. Apply at the cuticle and massage into surrounding skin.
